Product photo	 
Denomination	310 L Water butt with cover and tap
Description	Round containers to collect rainwater, available in different sizes and capacities, provided with safe fastening. - Capacity: L 310 - Dimensions: cm ø80x97h Colour: green
Physical characteristics	Container and cover made of HDPE (70% RECYCLED PLASTIC) Tap made of HDPE, polypropylene and rubber
Installation and use	QR CODE on the label
Packaging	Loose
Labelling	EAN code with qr code
Directive and / or reference standards	In accordance with the following regulations: - Reg. (CE) nr.1907/2006 (REACH Regulation) - Reg. UE 988/2023 (General Product Safety Regulation)
Product Safety	Place the container on a flat, stable, and level surface to prevent tipping or collapsing. Avoid overfilling. Ensure the lid is always securely closed to prevent dirt, leaves, or small animals from entering the container. Position the container in a sheltered area or away from direct sunlight to prevent plastic wear due to UV rays and overheating of the water. During winter months, empty the container or protect it from freezing to avoid structural damage. Keep the container out of reach of children and pets, ensuring they cannot open the lid or access it accidentally. It is recommended not to move the container when it is full. Follow the instructions provided via the QR code on the label for tap installation.
